

24/7

INCIDENT SUPPORT AT YOUR FINGERTIPS

“If we needed any legal input on safety, health and environmental issues there is absolutely nobody else I’d go to.”

UK Group Solicitor, Crown Packaging UK Ltd.

Hammonds

SAFETY, HEALTH AND ENVIRONMENTAL (SHE) ISSUES ARE KEY CONCERNS FOR ANY BUSINESS. HOWEVER, NOT EVERY BUSINESS HAS SPECIALISTS IN-HOUSE AND THIS IS WHERE HAMMONDS CAN HELP.

We have developed a unique 24/7 service to support operational staff, in-house legal departments and senior management teams including the Board.

At the time of an incident it is difficult to remain objective and in control. If there has been a fatality the police will be the first investigators on site and will often treat the incident as a murder scene. Other regulators can also be very demanding at this difficult time and it is easy to say and do things that with hindsight were not in the best interests of either the company or individuals. Personal liability attaching to individuals is also a very real risk with these types of regulatory offences.

If you find yourself managing a safety, health or environmental incident and need assistance you will find an experienced Hammonds' lawyer available to provide you with immediate, practical advice 24 hours a day, 365 days a year.

The service can also include access to an affiliated team of occupational health and safety consultants that provide clients with proactive advice – assisting them to avoid accidents in the first place. The service provides a unique blend of incident response and technical health and safety advice.

Our hotline provides 24/7 support in the event of a major accident, fatality or environmental incident. The hotline number will put you in touch with one of our SHE lawyers. They will be able to provide you with essential short term assistance ensuring that an incident is managed from the outset.
