### Temporary Framework for State Aid

- State aid (i.e. government support that gives a company a competitive advantage over other companies) is prohibited, unless there are justified reasons of general economic development.
- The European Commission adopted a State Aid Temporary Framework which provides flexibility to the existing state aid rules. A template for the notification of measures that will compensate companies that have suffered damages.
- All companies requesting state aid from their governments.
- Amongst others:

  - Danish guarantee scheme for SMEs ([here](https://ec.europa.eu/research/participants/data/ref/other_eu_prog/cosme/legal/3rd-country-participation_en.pdf))
  - German loan programs within promotional bank ([here](https://ec.europa.eu/research/participants/data/ref/other_eu_prog/cosme/legal/3rd-country-participation_en.pdf))

- The relaxation of state aid rules is available for:
  - Direct grants, selective tax advantages and advance payments – Member states can set up schemes to grant up to €800,000 to a company in order to address urgent liquidity needs
  - State guarantees for loans taken by companies from banks – Member states can provide

- Application for state aid ordinarily follows the broader state aid procedures under Article 107 of the Treaty of Functioning of the EU.
- There is, however, a much faster procedure of approval under these flexible rules:
  - Member state submits a state aid scheme based on the template of notification of the measure
  - European Commission will
- Available from 1 February 2020 until the end of December 2020.
